

The Counting Numbers

ian.mcloughlin@gmit.ie

vanilla
chocolate
strawberry

1 2 3

$$\mathbb{N} = \{1, 2, 3, \dots\}$$

$$1 \leftrightarrow \text{vanilla}$$

$$2 \leftrightarrow \text{chocolate}$$

$$3 \leftrightarrow \text{strawberry}$$

$2\mathbb{N}$

$$\mathbb{N} = \{1, 2, 3, \dots\}$$

$$2\mathbb{N} = \{2, 4, 6, \dots\}$$

$$\mathbb{N} \leftrightarrow 2\mathbb{N}$$

$$1 \leftrightarrow 2$$

$$2 \leftrightarrow 4$$

$$3 \leftrightarrow 6$$

\dots

Computer programs are binary strings.

Treat them as integers.

They're countable.

(Slight issue with leading zeros.)
